

Living Laboratories

ICE WaRM presents a workshop on

Wetland ecosystems on the Fleurieu Peninsula Workshop 2

WHEN: Thursday 10 September 2009

TIME: 9.00 am - 3.00 pm

WHERE: Mecure Grosvenor Hotel
Glenroy Room
North Terrace, Adelaide

To register or for further information:
Email: dthaw@icewarm.com.au
Phone: 08 8236 5212

Workshop Programme

9:00am	Welcome and Introductions	Paul Dalby Workshop purpose, context and objectives
9:10am	Ensure existing and new data and knowledge are encapsulated in decision making and policy development governing the management of these systems	Darren Willis: presentation on Upper South East
9:50am	Develop a research program to improve the understanding of wetland restoration on the FP and develop tools for achieving this outcome	Alys: presentation on restoration program aims and priorities
10:20am	Develop a research program to investigate the ecological and production impacts of 10% and 25% water diversions (with low flow bypasses on dams)	David Deane: recap Current water diversions Implications of meeting policy targets of 10% and 25%
10:50am	MORNING TEA	
11:10pm	Where to from here? - Proposal/ Funding	Group discussion: Would this sort of system be useful for Fleurieu swamps? What would it take for us to implement such a system? Design an "in field" experimental approach to test optimal restoration programs in line with achieving regional restoration and recovery goals, and to compliment the 10% and 25% targets. What research is required to understand the impact of new policy options on ecological and production outcomes
12:45pm	LUNCH	
	Close
